Kaunas, Lithuania

SUMMARY

Motivated and creative individual, with a strong background in team leadership and a strong passion for coding. I have recently enrolled in Kauno Kolegijos Software Systems program. I am experienced in HTML, CSS, Bootstrap, JavaScript, React, Git and also learning C# and Java. With my experience in team leadership, I am confident in my ability to manage projects and make a positive contribution to any team. I am an enthusiastic and creative learner who is keen to kick-start my career as a junior front-end developer and strive for excellence in every project I take on.

EXPERIENCE

DEVELOPMENT EXPERIENCE

Below are couple of development projects I completed which can be found in my bio:

<https://dainiusstrazdas.tech/>

Portfolio Project #1: „Expense Tracker“

The app allows user to enter expenses based on the date which he can see later in the graph by optionally selecting a year. Made with React, learned more about components in general, passing props, states and react router.

Portfolio Project #2: „Restaurante“

The app developed using HTML, CSS for the structure and styling in the front-end and in the back-end server NodeJS, routes was handled by ExpressJS. The app allows users to share his favorite restaurant, all data user entered save in the JSON file. The app also used the Unsplash API to fetch

random image for more pleasant user experience when clicking on the restaurant.

Portfolio Projects #3 and #4 „Architecture“ and „Designer“

Two landing pages built with HTML and CSS using designs from Figma. Learned more about Figma.

01/2021 - 10/2022

TEAM LEADER

Narbutas International

I recently held a position as a Team Leader (before as a Work Organizer) at a furniture manufacturing company. In this role, I was responsible for overseeing and coordinating the day-to-day operations of the production line. This included managing a team of 24 employees, ensuring the production line ran smoothly, and that deadlines were met. I was also responsible for ensuring that quality standards were met and that the production line was running efficiently.

Overall, my experience as a Team Leader has been incredibly rewarding. I have gained a wealth of knowledge in production management and have been able to effectively lead a team of employees. It has been a great opportunity to further develop my leadership skills and to be a part of a successful and growing company.

CERTIFICATES

2021 - Present

Improvement of production processes

EDUCATION

2025

SOFTWARE SYSTEMS

Kauno Kolegija - Kaunas, Lithuania
Professional Bachelor of Computing

This study program will give me knowledge about the conceptual basics of informatics and abilities to apply the above knowledge in designing, developing, and implementing software systems. I will have knowledge of software system engineering, planning, methods of organization, legal and regulatory documents governing cyber security and data and information safety, and abilities to ensure software systems safety.

SKILLS

HTML	React
CSS	Git
Responsive Design	Java
Bootstrap	C#
JavaScript
